

COVID-19 VACCINATION

Subject line: Centura Health remains committed to community partners

Date: Feb. 4, 2021

Hello,

Centura Health remains committed to partnering with your school and offer the COVID-19 vaccine. We believe that this vaccine truly symbolizes hope for our thriving communities as we move toward the end of the pandemic.

We have been actively extending invitations for community partners to receive the COVID-19 vaccination in accordance with the State of Colorado phased COVID-19 vaccination plan since late December.

As you are likely aware, on Jan. 29, 2021, the state of Colorado expanded its phased prioritization guidelines. Beginning Feb. 8, Coloradoans age 65-69, preK-12 grade educators and child care workers in licensed programs, and continuity of state government will be eligible to be vaccinated.

We will continue to invite individuals who fall within the state guidelines, as supply allows. Please carry the message forward to your educators that we have their names in our database will be sending invitations when we have vaccination supply to accommodate them, while continuing to follow the phased prioritization set forth by the state of Colorado.

Our vision is that every community, every neighborhood, every life can be whole and healthy, and we are excited to be your partner in providing this vaccine in the coming weeks and months, and in ending this pandemic. Thank you for your partnership and patience in this process.

Questions?

- If you have clinical questions, please consult with your health care provider.
