

# 2019 Summer School

## for Jeffco high school students

Our summer school options are varied and structured to meet different needs at different locations; some are academic while others are enrichment-based. If you are interested in exploring the options, talk with a counselor or teacher at your school to find out if they will have any summer programming at your school.

---

### For **high school** students, summer school will be at the locations below.

- Open to all Jeffco high school students; mainly for those who need to recover or complete credits.
- Follows a blended format, with varying options for face-to-face support.
- Students will need to access a computer and the internet daily, and complete work from a home setting.
- Courses are set up in a mastery format (*\*exception at bottom*) where pretesting determines amount of content to be learned. Students move through designated coursework at their own pace.
